

### *Sustainable Development in Louis Hotels*

Scientific evidence strongly suggests that humanity's activities are leading to changes in earth's climate and the world will experience more dangerous changes in climate in the future. Since these changes will have potentially catastrophic consequences on our planet, we are all responsible to react before it is too late. In Louis Hotels we work systematically to minimize and/or prevent negative effects on our environment.

#### **ACTIONS TAKEN FOR THE PROTECTION OF THE ENVIRONMENT**

- **Saving energy by reducing energy consumption**
  - Using solar energy where possible, especially in hot water production
  - Eliminate unnecessary operation of A/C by means of key card switches in all rooms and limit switches for the doors and windows
  - Using eco lamps where possible
- **Saving water**
  - Use of watersavers to reduce water flow to showers and wash basins
- **Waste management**
  - Reducing the amount of waste from our activities
  - Recycling in all locations with available facilities
- **Using mostly environmental friendly materials in our housekeeping departments**
- **Encourage our employees to participate through training and seminars**
- **Encourage guests to participate in saving energy**

#### **AWARDS & CERTIFICATES**
